IRELAND AND ENGLAND COME TO AN AGREEMENT

President Reads His First Message to Congress in Person

HARDING SUGGESTS A NEW AMENDMENT TO THE CONSTITUTION

WASHINGTON, Dec. 6.—President Harding informed Congress Sinn Fein delegates, affording a bain his first annual message that a "most gratifying world needings sis for the settlement of the Irish shment," by arms conference "is not improbable". The message was question delivered by the president in person in the chamber of the House and in the presence of the delegates to the conference and most of th diplomats regularly stationed in Washington. At the outset, the procedent discussed world conditions, saying, "the world restoration program" would have to be worked out "by the nations most directly concerned." The United States will have a likely concerned. due tly concerned." "The United States will help." he added, and flishly, because there is a compensation in the consciousness assisting; selfishly, because both commerce and international exchanges in trade which marked our high tide of fortunate advaluement, are possible only when the nations of all continents are restored to stable order, and normal relationship." Turning to dodomestic problems, the president argently recommended the early ment of a permanent tariff and foreign debt refunding bills. (By Associated Press) also announced that later on he would make some recommendaabout renewed consideration of the tax program, involving two million dolars became avail-...... as federal aid for road construction the strike made on Saturday

The heavy wind storm of last apparent.

MORNING SETTLEN

LONDON, Dec. 6-An agreement reached by the British and the Sinn Fein today binds both sides to recommend it to their parhaments. It is a formal, detailed and conclusive document, and the terms prevent the necessity of further negotiations. Should the Dail Eireann agree to the document, and a disagreement is not looked for, as it meets satisfactorily the points raised by the Sinn Fein, it will be embedded in a bill to be submitted to the British Parliament. The emisent of Cister is not required to make the new Irish agreement effective. She is given the opportunity of with-drawal in a month, reserving then to her present states within a territory to be decided by the boundary commission.

A provinced government is to be formed in southern Ireland while the British parliament is considering the agreement. On the prestion of allegiance a form of words was found which judislied ooth the government and the Sinn Fein. The recognition of Ireland as an independent state is said to be clear. The British cabinet unanimously adopted the struct of the agreement with the Sinn Fein, and congratulated Lloyd theorge and the members of ****** in designation in the Irish con-

ference on the success of the ne-

gineer, and Br Cleve E Kindall, uncommon was signed for the gov-

toyees of any of the mines or othe rs who have worked in the Totopah, dail. The examinations will be made By Associated Pressy t the old gymnasium building above LONDON, Dec. 6 The Evening as to his case if he desired but no conclusion of the meeting ine else will see it

The Bureau of Mines officials would like as many men as possible o come in for chest examinations. ot only those who fear that their ungs are affected by the dust, but iso those whose lungs are un msaired, as in this way a better averge of the work will be obtained and he value of the work will be gree ly increased

One of the main functions of the United States Bureau of Mines is o make studies of conditions aroun nines and, whenever possible, to offer suggestions for improvements which would better protect the health of the miners
